**Section** NA

**Page** NA

**Figure Table** NA

**Category Name** Design

**Actionee** HAIS

**Sub Category**

**Subject** Data for (and from) the SMC

## **Description of Problem or Suggestion:**

The PDR did not substantially mention generation of data for, transfer of data to, or receipt of data from, the SMC. What will the EOC provide for, or receive from, the SMC? How will the data be transferred? How often is it required? To what accuracy? How is it formatted? Does the EOC design currently provide capabilities for measuring, integrating, storing, and transferring the necessary data?

## **Originator's Recommendation**

Include in the design a means of generating descriptive data for the SMC, and if appropriate, receiving and reporting data from the SMC. This includes determining from SMC development personnel what data the SMC expects to receive from the EOC; and what data the SMC expects to provide to the EOC, if any, for EOC management analysis, reporting, and display purposes. Does the EOC desire SMC-provided data from other EOSDIS non-FOS subsystems (e.g. EDOS/Ecom, ISTs, PDF, DAACs) to evaluate EOC performance and user satisfaction? Include MOM support team in the discussions.

## **GSFC Response by:**

## **GSFC Response Date**

**HAIS Response by:** D. Herring

**HAIS Schedule** 2/3/95

**HAIS R. E.** D. Dunn

**HAIS Response Date** 1/24/95

The information presented at PDR was based on understanding documented in the CSMS Internal Interface Control Document for the ECS Project (313-CD-003-001) dated January 1995. Additional details of this interface will be provided in the CDR timeframe.
